

# Mohamed Mahmoud Mohamed

Data Analyst | Reporting Analyst | Business Intelligence (BI) Analyst

Cairo, Egypt | +20 110 848 5447 | [meng44506@gmail.com](mailto:meng44506@gmail.com) | [linkedin.com/in/eng-mohamed-88a326304](https://www.linkedin.com/in/eng-mohamed-88a326304) | Portfolio: [meng44506-star.github.io/portfolio](https://meng44506-star.github.io/portfolio)

## PROFESSIONAL SUMMARY

---

Data Analyst and Reporting Analyst with a Bachelor's degree in Information Systems and hands-on experience delivering end-to-end business intelligence solutions across Sales, Human Resources, E-commerce, and Supply Chain domains. Skilled in data extraction, data cleaning, data modeling (ERD, DFD, star schema), and building interactive, multi-page Power BI dashboards using SQL, DAX, Power Query, and Advanced Excel. Experienced in translating raw, unstructured data into validated, decision-ready KPIs and in performing root-cause analysis on business performance issues through drill-through reporting. Background also includes high-precision data labeling for autonomous vehicle AI/ML systems, reflecting strong analytical accuracy, attention to detail, and structured problem-solving. Seeking to apply strong data analysis, database design, and dashboard development skills to drive measurable business impact as a Data Analyst / BI Analyst.

## CORE SKILLS

---

### Data Analysis & Reporting:

Data Analysis, Data Cleaning, Data Preparation, Exploratory Data Analysis (EDA), KPI Development, Business Analysis, Root-Cause Analysis, Analytical Storytelling, Reporting

### Business Intelligence & Visualization:

Power BI, Interactive Dashboard Development, Data Visualization, Drill-Through Analysis, Business Intelligence (BI) Reporting

### Power BI Toolset:

DAX (Data Analysis Expressions), Power Query, Data Modeling, Star Schema Design, Calculated Fields & Measures, Multi-Page Dashboard Design

### Database & Data Modeling:

SQL (Complex Joins, Subqueries, Aggregations, Data Extraction), SQL Server, Relational Database Design, Data Modeling, ERD (Entity-Relationship Diagrams), DFD (Data Flow Diagrams), Database Analysis

### Data Engineering:

ETL Processes (Extract, Transform, Load), Data Quality Assurance, Data Validation, Data Pipeline Optimization

### Microsoft Excel (Advanced):

Pivot Tables, VLOOKUP, XLOOKUP, Power Query, Advanced Formulas, Data Cleaning

### Business Domains:

Sales & Profitability Analysis, Customer Behavior Analytics, Human Resources (HR) Analytics, E-commerce Analytics, Supply Chain & Operations Analytics, Employee Performance Metrics

## PROFESSIONAL EXPERIENCE

---

### Data Analyst & Reporting Analyst (Independent Analytics Projects)

2024 – Present | Cairo, Egypt

- Spearheaded end-to-end data analysis projects focused on sales growth, commercial performance tracking, and customer behavior metrics across multiple business domains.
- Designed and developed interactive, multi-page Power BI dashboards that streamlined operational monitoring, improved reporting accuracy, and enhanced business visibility for stakeholders.
- Built complex data models for HR and employee performance metrics, using ERD and data modeling techniques to enable workforce allocation and retention analysis.
- Utilized advanced SQL queries (joins, subqueries, aggregations) to extract, filter, clean, and prepare large, relational datasets for analysis.

- Applied Power Query and Advanced Excel (Pivot Tables, XLOOKUP) to clean and transform raw data prior to modeling and visualization.

## Data Labeling Specialist

*Micro Engineering | 2023 – 2025 | Cairo, Egypt*

- Classified and structured high-volume, multi-modal datasets used to train Artificial Intelligence (AI) and Machine Learning (ML) models for autonomous self-driving vehicles.
- Achieved 98%+ accuracy in data annotation, object detection, and semantic classification, directly improving model training safety and predictive consistency.
- Collaborated with AI engineering teams to optimize data pipelines and refine data quality guidelines for complex edge-case scenarios.

## KEY PROJECTS

---

### End-to-End Sales Performance & Profitability Analysis

*Tools: Power BI, SQL, Excel, Power Query, Pivot Tables, Data Modeling*

- Executed the complete data analytics lifecycle on a sales dataset covering orders, customers, products, and shipping methods, from raw data to a decision-ready reporting solution.
- Cleaned, validated, and transformed raw data using Power Query, and engineered calculated fields for net profit, returned items, and discount impact analysis.
- Designed an optimized relational data model and built a 4-page interactive Power BI dashboard, including sales overview KPIs and geographic (map-based) regional analysis.
- Implemented drill-through functionality within a Profit & Loss module to perform root-cause analysis on negative margins and inform discount strategy decisions.

### HR & Employee Performance Analytics Dashboard

*Tools: SQL, Power BI, DAX, Power Query, Data Modeling*

- Developed an end-to-end HR analytics dashboard to monitor workforce allocation, employee attrition, job satisfaction, performance, and demographic trends.
- Extracted and prepared employee datasets from relational databases using SQL (complex joins, aggregations, and subqueries) to ensure data integrity.
- Built a relational data model using ERD design principles and DAX formulas to create dynamic KPIs tracking turnover rate, absenteeism, and performance evaluation trends.
- Delivered actionable, visual insights to stakeholders and HR management to support data-driven workforce planning and talent retention decisions.

### Amazon Products Analysis (E-Commerce Analytics)

- Tools: Power BI, Excel, Power Query — Analyzed product pricing, discount strategy, customer ratings, and category performance across a large e-commerce catalog, building category-level KPIs to identify products with competitive pricing and strong customer engagement.

### Supply Chain & Operations Dashboard

- Tools: Power BI, Excel, Power Query — Built a multi-page dashboard combining operational KPIs (lead time, defect rate, shipping cost) with financial KPIs (revenue, estimated profit) to support supply chain quality and operational efficiency improvements.

## EDUCATION

---

### Bachelor of Information Systems

*Graduated 2022 | Cairo, Egypt | Cumulative Grade: Very Good*

Core Focus: Database Management, Systems Analysis, Data Flow Diagrams (DFD), Entity-Relationship Diagrams (ERD), Business Intelligence, Enterprise Solutions.
