

MOHAMED MAHMOUD MOHAMED

Data Analyst / Reporting Analyst

Phone: +20 1108485447 | Email: meng44506@gmail.com | Location: Cairo, Egypt | LinkedIn: [linkedin.com/in/eng-mohamed-88a326304](https://www.linkedin.com/in/eng-mohamed-88a326304)

PROFESSIONAL SUMMARY

Results-driven and detail-oriented Data and Reporting Analyst with a solid foundation in Information Systems. Proven track record of transforming raw data into actionable business insights through comprehensive, end-to-end analytics projects across sales, customer performance, and employee metrics. Adept at building advanced interactive dashboards, data modeling, and engineering complex data pipelines using SQL, Power BI, and Advanced Excel. Background includes valuable experience in high-precision data labeling for autonomous vehicle AI systems, demonstrating exceptional analytical precision and structural thinking.

KEY PROJECTS

End-to-End Sales Performance & Profitability Analysis

Tools: Microsoft Excel, Power Query, Pivot Tables, Power BI, Data Modeling

- Executed the complete data analytics lifecycle on a comprehensive sales dataset covering orders, customers, products, and shipping methods.
- Cleaned, validated, and transformed raw data using Power Query, engineered calculated fields for Net Profit, returned items, and discount impacts.
- Designed an optimized relational data model and built a 4-page interactive Power BI dashboard featuring an intuitive landing page, Sales Overview KPIs, and Geographic regional maps.
- Implemented advanced Drill-Through functionality within the Profit & Loss module to perform root-cause analysis on negative margins and optimize discount strategies.

HR & Employee Performance Analytics Dashboard

Tools: SQL, Power BI, Power Query, Data Modeling, DAX

- Developed an end-to-end HR dashboard to monitor workforce allocation, employee performance, retention rates, and demographic metrics.
- Extracted and prepared employee datasets from relational databases using SQL (Complex Joins, Aggregations, and Subqueries) to ensure data integrity.
- Built robust data models and utilized DAX formulas to create dynamic KPIs tracking turnover rates, absenteeism, and evaluation trends.
- Delivered actionable visual insights to stakeholders and HR management, enabling data-driven decisions for workforce optimization and talent retention.

WORK EXPERIENCE

Data Analyst & Reporting Analyst (Projects Era)

2024 – Present | Cairo, Egypt

- Spearheaded end-to-end data analysis projects focused on sales growth, commercial tracking, and customer performance metrics.
- Designed and implemented interactive multi-page Power BI dashboards that streamlined operational monitoring and enhanced business visibility.
- Developed complex data models for HR and employee metrics, enabling stakeholders to optimize workforce allocation and performance tracking.
- Utilized Advanced SQL queries (JOINS, Subqueries, Aggregations) to extract, filter, and prepare large datasets from relational databases.

Data Labeling Specialist | Micro Engineering

2023 – 2025 | Cairo, Egypt

- Classified and structured high-volume, multi-modal datasets used to train Artificial Intelligence and Machine Learning models for autonomous self-driving vehicles.
- Ensured 98%+ accuracy in data annotation, object detection, and semantic classification, directly improving model training safety and predictive consistency.
- Collaborated with AI engineering teams to optimize data pipelines and refine labeling annotation guidelines for edge-case scenarios.

TECHNICAL SKILLS

Data Analytics & Visualization: Power BI (Data Modeling, DAX, Interactive Dashboards, Data Visualization, Power Query), Advanced Microsoft Excel (Pivot Tables, VLOOKUP, XLOOKUP, Power Query).

Database Management: SQL (Data Extraction, Complex Joins, Aggregations, Subqueries).

Data Engineering: Data Cleaning, Data Preparation, ETL Processes, Data Quality Assurance.

Business Domains: Sales Analysis, Customer Behavior Analytics, Reporting & Dashboard Creation, Employee Performance Metrics.

EDUCATION

Bachelor of Information Systems

Graduated: 2022 | Cairo, Egypt

- **Cumulative Grade:** Very Good
- **Core Focus:** Database Management, Systems Analysis, Business Intelligence, Enterprise Solutions.

LANGUAGES

Arabic: Native Speaker | **English:** Professional Working Proficiency
